

# The Euglena Experience...

I have been busy with work for about 3 years and I have been catching a cold easily. I learned about Euglena and the products on the radio. I bought "Euglena Plus" when I went to Euglena Cafe in Ishigaki Island, Okinawa and I've taking it. I got to be able to do my best again even though I'm very tired and I haven't caught a cold after taking Euglena. In the ninth year of marriage, we've got a child and my wife and I continue taking it. Thank you.

I have eczema for many years, each time I get in contact with cleaning chemicals or new skincare products, there will be an outbreak. I have taken fish oil, vitamins and skin supplements but they didn't help much. I was given a bottle of Euglena P-3 to try. Initially I had an outbreak after taking, knowing my own immune system, I continued taking for 2 weeks and my skin condition improved tremendously. By the 3rd week, my eczema is almost gone. I am so happy that Euglena P-3 helps my skin to heal.

I have been taking Euglena Plus for a couple of years. In the meantime, there were many nice changes in my body. 1) My damaged and dry hair became better and shiny. 2) I felt the nail growing faster (I think that the metabolism got better), 3) My acne skin is improved, 4) I don't get sick which I believe come from the satisfied feeling that I'm taking 59 kinds of nutrients. I appreciate for Euglena every day.

I think it is an optimal supplement as postoperative nutritional support of colorectal cancer. I especially feel the remarkable improvement on bowel movement. I am proud that I have found good one, because it is much different from other supplements.

I've been taking Euglena Plus and my husband has been drinking Midorijiru (Euglena drink) for a year. A year ago at the checkup, I had dyslipidemia, but this year, total cholesterol fell (241 → 215) and LDL cholesterol fell (159 → 128) as well. I am really surprised that it went down so much. It seems that it is not a dream to be in the normal range. Also, the LDL / HDL ratio is within the normal range of 2.3 → 1.9. I'm so happy and feel thankful to Euglena. I am looking forward to get the checkup next year.

My friend recommended Euglena and I have been taking Euglena supplement for two months. The hay fever season has come and I was upset when I heard the pollen forecast on TV, but the symptoms that have always appeared at the end of February have not come out this year (as of March 5). It is mysterious. Thanks to Euglena? I hope that comfortable the symptoms will continue. I gave an email to thank my friends, and my friend recently said that she also feels fine and is not going to the otolaryngology any more. I am pleased that our mucous membrane is getting stronger. Euglena, awesome. Thank you.

I've purchased a lot of supplements in the past, and I can not count how many of them I threw away. However, after 2 months of taking Euglena supplement, my bowel movement got better and my daughter said that she now doesn't get canker sore(stomatitis) easily. I am thankful for the suitable amount of the daily dosage as well. I think I can continue Euglena.

After taking Euglena, these good changes were seen in my body : 1) The pain like gout in my foot is gone, 2) The stomach fat decreased, 3) I did not get hay fever this year. I think that the effect is very wide, so please stably produce and provide it to many people.

**10 Aug 2015, Male 42 yr old, Japan**

Since I started taking Euglena, I haven't caught a cold easily. I am taking other supplements to maintain health, but I felt the difference after adding Euglena. I also feel sympathy for the fact that Euglena is trying to help people who suffer from malnutrition. I hope the price to become cheaper in the future, but I will continue taking Euglena with my husband. Thanks.

I let my mother (age:90) take Euglena Plus and has been over a year. She used to have eczema and physical problems, but recently her physical condition became stable and eczema was completely gone. I am convinced that it is the effect of Euglena. Thank you for supporting our family's health.

I started taking Euglena about a half year ago, after seeing it in a magazine. As I finished reading the article, I realized that it is quite different from other supplements. Six months after taking Euglena, my hair got firm and resilient and I feel more energetic. Also, I used to have a lot of nasal discharge appeared in sinusitis, but it decreased to a small amount. I do not understand the mechanism clearly, but it may be the effect of Euglena.
